“Lead-Safe Certified Firm”
in the United States,
Certification #NAT-67040-1

WHO WE ARE

We started in 2004 with four employees and have grown to a team of 30 full and part time employees. All of our employees go through a comprehensive safety program to meet the needs of our clients. Our staff is trained by a third party for the following:

OSHA 30 Hour and 10 Hour Construction

•

40 Hour HAZWOPER

•

Lead Safety for Renovation, Repair & Painting

•

Lead & Cadmium Operations & Maintenance

•

Mold Remediation

•

Mobile Equipment Training

•

Lift Operator Training

•

Confined Space Entry Training

WHAT WE DO

We REMOVE ASBESTOS, LEAD, AND HAZARDOUS WASTE from industrial, commercial, and residential buildings. As a result of our success, we have expanded into interior demolition. WE CURRENTLY HOLD ASBESTOS CONTRACTOR LICENSES IN THE FOLLOWING STATES:

OHIO #AC1870,

MICHIGAN # C42754

PENNSYLVANIA #C0885A

WHO WE SERVE

We have worked for some of the most safety sensitive sites such as Ohio EPA, PPG Chemical, NASA, and the US Navy. We also serve schools and Universities with emergency response and maintenance contracts for clients such as Akron Public Schools and Kent State University. We don't always have to take the lead on projects. We have built successful relationships with other contractors that perform demolition, construction, renovation, and restoration.

HEPA

Environmental Services, Inc.

SAFETY

We are very proud of our safety record and currently have an EMR rating of 0.52 allowing us to pay reduced rates on our workers compensation. We have participated in the Drug Free Safety Program along with Return to Work Program since 2005. We use job specific safety plans for each project and we are always investing time and money in safety.

INSURANCE/BONDING

We carry six million dollars in Asbestos Liability Insurance, as well as Workers' Compensation in the State of Ohio, PA, and Michigan. We have bonding capabilities for public and private jobs. Our bonding is through an A.M. Best rating of "A" (Excellent) rated company.

The BEAST™

RESIDENTIAL ASBESTOS REMOVAL

THE PROJECT

It is estimated that millions of homes have been insulated with Vermiculite/Zonolite insulation contaminated with asbestos. Many people have asbestos in their homes and don't even know it.

► the challenge

How do you remove this loose fill insulation without exposing anyone that lives there, and how can you do this for a price a home owner can afford.

THE SOLUTION

We put together the safest, cleanest, and most efficient vermiculite removal system. Our self contained vacuum system is called The Beast™. This system removes vermiculite through a leak proof hose to our containment trailer.

“

This company did an excellent job assisting the homeowner with the documentation required to complete their claim with the Zonolite Attic Insulation Trust. The successful claim allowed the homeowner to recoup a significant portion of their cost. - Edward Cottingham, ZAI Trustee

”

ASBESTOS ABATEMENT: FOUR LARGE INDUSTRIAL SITES

THE PROJECT

Removal of asbestos from four large manufacturing facilities in the Mahoning Valley. Removal of asbestos containing drywall, plaster, floor tile & mastic, vapor barrier, pipe, and boiler insulation.

► the challenge

Perform the abatement within the time constraints of the client's schedule in full compliance with the regulatory agencies and maintain an unblemished safety record. HEPA made the commitment and finished this project on time and on budget.

► the client

Contact:
Mike Perry
440.933.6348

► contract value

\$1,200,000.00

THE SOLUTION

When working in manufacturing facilities over 80 years old you have multiple renovation dates which means multiple layers of building materials. In one office there were five layers of flooring to remove in order to abate the asbestos containing layer. These challenges are overcome by assembling the best team and implementing the best plan of action. We joke in the office about "plan C" but in reality that is what it takes. We have to have back up plans for back up plans.

METROPOLITAN HOUSING

THE PROJECT

The Federal Government wanted to renovate a public housing development.

► the challenge

A large general contractor needed an asbestos abatement company to remove all of the asbestos containing walls and ceilings from 16 multi-unit apartment buildings while coordinating with multiple trades on a demanding schedule.

► the client

Cavanaugh Construction
1744 Collier Rd.
Akron, OH 44320

Contact:
Chad Davidson
330.753.6658

► contract value

\$850,000.00

THE SOLUTION

We met the aggressive schedule on this project by starting with a great plan, tremendous communication, and a team that worked together every day to achieve these results. Sure we battled Ohio weather for three years but we still maintained our compliance, our safety, and our budget.
